

Air Conditioning Service

It only takes a simple A/C compressor problem to bring your car's A/C system to its demise. Many of the problems that can occur in your auto A/C system can be connected with the loss of refrigerant which could lead to compressor failure. How about that smell? Did you know that mold and mildew can build up in your vehicle's A/C evaporator causing your air to smell? When was the last time you serviced your vehicle's A/C system? With Petra's A/C products and services, we can detect leaks, lubricate the system and even eliminate odors caused by mildew, mold and bacteria.

Take care of your vehicle's A/C System with Petra products and services.

- Detect leaks and restore cabin cooling with Petra ICE32®
- Eliminate odors with Petra Auto A/C Evaporator Odor Eliminator Kit
- Protects A/C compressor
