

Petra ICE³² Auto A/C Treatment - Liquid

PN 9023 (1.5oz) Specification Sheet

Product Description:

Petra ICE³²® Liquid High Performance Automotive R-134a A/C Additive is compatible with all common automotive air conditioning lubricants such as PAGs and POEs and with R-134a and other HFC systems. Petra ICE³² is also compatible with all elastomer types commonly used in MAC systems and complies with the SAE J2760 compatibility standard. It is biodegradable and does not contain chlorinated or sulphonated chemistry.

Advantages & Uses:

- For R-134a systems
- Compatible with NEW Refrigerant - R-152a
- Compatible with all mobile A/C system lubricants and materials

Features:

- Creates film that seeks out and adheres to metal surfaces.
- Polarized & modified molecules power through A/C system providing better flow & improved cooling performance.
- Extends A/C system life
- Prevents sludge – keeping compressor clean
- Eliminates moisture & acid
- Cuts humidity – drier air improves cabin comfort
- Contains UV dye for finding leaks
- 1.5 oz. liquid
