

Petra Transmission System Cleaner

PN 5001 (12oz) Specification Sheet

Product Description:

Formulated for use with all transmissions and transmission fluids, Petra Transmission System Cleaner cleans away harmful sludge, varnish and deposits while helping to extend o-rings and seal life. As ATF deteriorates, sludge and varnish can build up leading to transmission failure. Petra Transmission System Cleaner removes sludge, varnish and other contaminants from the transmission, torque converter, pump, ATF cooler and fluid lines. Keeping the system clean improves shifting and extends the life of the transmission.

Advantages & Uses:

- For use with all transmission fluid exchange machines or services
- For use with all transmissions and ATF fluid types
- Cleans away harmful sludge, varnish and deposits
- Prepares transmission for new fluid

Features:

- Helps extend o-ring and seal life
- Improves shifting and extends life of transmission
