

Petra Universal Radiator Treatment

PN 4003 (12oz) Specification Sheet

Product Description:

Petra Universal Radiator Treatment is formulated to assist in the prevention of rust and corrosion in automotive cooling systems. This product may be used in cooling systems for cars, trucks, farm equipment and buses. Petra URT will protect aluminum, copper, iron, brass and other metals found in all cooling systems. Petra URT will not harm plastic or rubber parts. Petra URT also contains a lubricating additive for water pump seals.

Advantages & Uses:

- Prevents rust from forming in the cooling system
- Prevents foaming which can cause water pump cavitation
- Conditions water pump seal for extended life

Features:

- Superior preventative maintenance product for cooling systems
- Treats in one easy step
- Provides excellent corrosion protection
